

Sidney Bernardin

Backend Software Developer

Stafford, VA | sidney.bernardin@gmail.com | (813) 461-3785

linkedin.com/in/sidney-bernardin-04755b374 | github.com/Sidney-Bernardin | sidney-bernardin.github.io

TECHNICAL SKILLS

- **Programming Languages:** Golang, JavaScript, Python, TypeScript, HTML, CSS
- **Frameworks and Libraries:** Express.js, FastAPI, Fastify.js, Prisma ORM, Vue.js
- **Tools:** PostgreSQL, Redis, MySQL, MongoDB, DynamoDB, Cassandra, NATs, Nginx, Docker, Git
- **Platforms:** Google Cloud Platform, Amazon Web Services, GitHub, DockerHub, Linux

PROFESSIONAL EXPERIENCE

Omnia WorkSpace | Backend Developer Intern

Remote | 2025 - 2026

Backend service development of an AI-enabled workspace platform.

- Applied **HTTP** request **batching** for **Google API** repositories, resulting in **10x** fewer requests per second.
- Created **test suites** using **snapshots** to work alongside **Docker** containers, enabling an efficient **CI/CD pipeline**.
- Wrote a **cache-aside** system with **TypeScript** and **Redis** to store user information from **third-party services**, increasing **read throughput** by 50x and reducing **quota usage**.
- Implemented user **authentication** with **OAuth** for a large-scale **domain-modeled** service, ensuring **secure resource sharing** between local and **third-party systems**.

PROJECTS

GoLive Video Streaming Platform | github.com/Sidney-Bernardin/Go-Live

2022 - 2023

Technologies: Golang, JavaScript, Vue.js, MongoDB, Redis, Nginx, Docker, Microservices, GRPC, RTMP/HLS

- Created an **RTMP/HLS** powered **live video streaming** platform as a **distributed system** using **Golang microservices** that communicate over **Pub/Sub** and **GRPC** protocols, enabling a **partition-tolerant** system.
- Implemented chat rooms powered by **Redis Pub/Sub** and **WebSockets**, allowing **real-time** user interactivity.
- Configured **Nginx** services to act as a **reverse-proxy gateway** and **RTMP media server**, ensuring requests are **evenly distributed** between **microservice** instances.

Gittogether Repository Hosting platform | github.com/Sidney-Bernardin/Gittogether

2026

Technologies: Python, FastAPI, PostgreSQL, HTML, CSS, Docker, Git

- Created a **full-stack Git** repository hosting **web application** by exposing **low-level Git RPC operations** behind **HTTP** endpoints, allowing users to **asynchronously** collaborate on **Git** repositories.
- Modeled user and repository relationships in **PostgreSQL** to **sync** application data with **Git objects**.
- Implemented repository forks and an **atomic pull-request pipeline** that handles **merge conflicts**, letting multiple users **collaborate** using a **feature-based** workflow.

CERTIFICATIONS

Codecademy | Backend Engineer Career Path

August 7, 2025

Professional Certification: codecademy.com/profiles/Sidney123456/certificates/810f53d14de24b938cc13c7c2af1e686
